

BRINGING CURES TO MENA PATIENTS

Our Mantra reflects our passion, our mission, our drive, and the thought behind our every action.

We strongly believe that all patients living in the MENA regardless of age, gender, creed and race should receive the same access and possibilities for treatment and cures.

By partnering with pharmaceutical pioneers, we are living our mantra by being

**the first company to successfully introduce
gene therapy in the MENA region.**

Our current partnerships with industry leaders and innovators such as Amicus Therapeutics, Albireo, Argenx, Apellis, Sarepta, LEO, Orchard Therapeutics, PTC Therapeutics, QUOIN Pharmaceuticals, is a testimony to our commitment of bringing cures to MENA patients.

 **GENPHARM**
COMMIT . CONNECT . CURE
